

## Erratum

In the English version of the article by V. B. Geshkenbein and A. I. Larkin JETP letters 43, 395 (1986) one sentence was translated incorrectly.

On page 397, first paragraph the sentence:

*For the tunnel Hamiltonian to be nondiagonal, the spin-orbit interaction need not necessarily occur in the insulating layer; the insulating layer need only be present in the superconductor.*

is not correct and should be replaced by:

**For the tunnel Hamiltonian to be nondiagonal, the spin-orbit interaction need not necessarily occur in the insulating layer; the spin-orbit coupling need only be present in the superconductor.**

V. B. Geshkenbein wishes to thank A. J. Leggett for noticing this error.
